

Call For Papers
WSEAS TRANSACTIONS ON SYSTEMS
Special Issue on Power System Protection

I. AIM AND SCOPE

Power system protection has nowadays become one of the issues to challenge by power system researchers and engineers. Protecting the power system aims at preserving the assets, and ensures continued supply of energy. This special issue on power system protection is devoted to research works that investigate and suggest solutions dealing with this main subject. Many topics relevant to the main subject are included (listed below). The proposal is an attempt to promote research in this field, address practical problems and assess the feasibility of the research-proposed solutions.

II. TOPICS COVERED

Authors are invited to submit their original and unpublished work in the areas including the following:

- Power system relaying
- Phasor measurement unit
- Power system communication (means and protocols)
- Power system reliability
- Optimization in power system
- Wide area monitoring and control
- Power quality
- Renewable energy systems.

III. IMPORTANT DATES

- May 30, 2012: Submission deadline
- August 15, 2012: Notification of the first-round review
- September 15, 2012: Revised submission due
- October 30, 2012: Publication of the accepted papers.

IV. SUBMISSION

- Manuscripts should be prepared according to the formatting instructions of available at WSEAS Transactions on Systems at <http://www.worldses.org/journals/systems/index.html>
- Manuscripts submitted to the Special Issue on Power System Protection are to be submitted following the standard submission webpage at <http://www.worldses.org/journals/systems> and notifying the Guest Editors via email as well.
- All submitted manuscripts will be reviewed using the standard procedure that is followed for regular submissions.

V. GUEST EDITORS

Dr. Abdelmadjid Recioui

Laboratory signals and systems

Institute of Electrical and Electronic Engineering

University of Boumerdes

Boumerdes, Algeria

Email: recmad2006@yahoo.fr, a_recioui@umbb.dz

Prof. Filippo Neri

Dept. of Computer Science

University of Naples

Naples, Italy

email: nerifil@gmail.com
